

# The 3 line Maestro

## LX33G GREEN BEAM

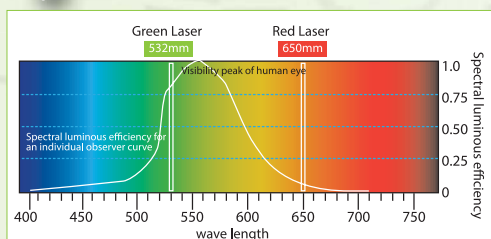

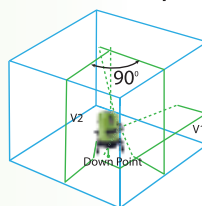

The all new Laser-EDGE™ Technology 3 line green beam IMEX laser combines a horizontal line with two vertical lines @ 90° and a red dot plumb spot for sharp definition pin point line accuracy, greater range and 20 hour run time between charging. This is the choice for trades that use line lasers all day every day.

### Features

- High viz green beam
- 1 horizontal line
- 2 vertical lines @ 90°
- 360° turntable with fine adjustment
- Plumb spot
- Rechargeable batteries

### Inclusions

- Laser Glasses
- Target Plate
- Battery charger
- Hard carry case

The LX33G has a green beam diode. The human eye responds many times better to green than red, subsequently the performance is greatly enhanced and working distance is greater

### Optional Detector for outdoors to 50m

Suits LX33G and other green beam line lasers

Previous model shown

Specifications IMEX LX-33G 012-LX33G 012-LX33GD-with detector	
Light Source	532nm Green
Output	Laser Class II
Accuracy	+/-2mm @ 10m
Damping Type	Magnetic – Self Levelling
Beams	1 Horizontal 230° 2 Vertical beams @ 90° 1 Red plumb spot
Hours of continuous use	Approximately 20 hours
Working distance	Up to 30m, dependent on light conditions
Dimension	65 x 120 x 95mm
Batteries	Lithium ion rechargeable

### HOT TIP

The human eye responds many times better to green than red, so the green beam appears brighter over a much longer distance. Green diodes are more costly to produce than red, but if you do larger commercial projects over larger distances.

**Go Green!**
